

SYSPRO CyberStore

Objective

To provide a comprehensive website engine to sell stock items online with real-time, integrated e-commerce shopping cart capabilities that meet a company's Business-to-Consumer (B2C) and/or Business-to-Business (B2B) requirements.

The Value of SYSPRO CyberStore

- Offers the complete shopping cart experience
- Create an unlimited list of product categories to match how you want your products sorted and displayed
- Enhanced product descriptions and images help market items being sold
- Online Product Search, including customer stock code cross-reference, makes items easier to find
- Existing customers receive their latest pricing as well as the current list price
- Show customers the quantity available of items they are interested in purchasing
- Sell in multiple units of measure online
- Support for multiple currencies
- Flexible shipping calculator allows you to base shipping costs on order value, volume or weight
- Simple, efficient and secure checkout process makes it easier for your customers to complete the purchase process
- Accept all major credit cards with Authorize.net or VeriSign Payflow Pro Gateways
- Receive orders in real-time into SYSPRO helps improve throughput and reduce data capture errors
- Improve customer service by automatically emailing order confirmations to customers
- Provide on-line order status to your B2B & B2C customers
- Allow customers to Review Order History online
- Save Cart Feature allows customers to keep track of items they like to re-order
- Provide on-line incentives for customers via the use of coupons
- Allow site visitors to store account preferences
- Powerful content engine provides a dynamic user experience and allows the web designer complete control of the site's look-and-feel
- 100% Microsoft .NET architecture

Complete Management Console

- Maintain categories and items through the powerful Management console
- Easily build catalog view lists per customer class
- Manage the creation and redemption of on-line coupons
- Manage customer accounts
- Manage online product descriptions and photos
- Establish different payment methods
- Limit items available and payment methods per customer

Real-Time Integration with SYSPRO e.net solutions

- Adhere to the same business rules inherent in the SYSPRO ERP product
- Automatically posts sales orders into SYSPRO
- Real-time, up-to-date pricing, as well as Line item and order discounts
- Real-time inventory levels
- Accounts for quantity and contract pricing
- Calculates tax using SYSPRO tax rules
- Adheres to customers credit limits and holds
